statement of line

workLOGIC is an engineered system of flexible furniture components, created as building blocks for open plan and private office applications. Whether assembled as standard configurations or field modified to fit specific design criteria, workLOGIC components are non-handed and reconfigurable for the life of the product. The illustrations below represent a quick reference of available desking & storage components. Please refer to the workLOGIC price list for the entire statement of line & additional options.

worksurfaces + supports

overhead storage + options

underdesk & freestanding storage
